Amendments to the Specification:

Replace the ABSTRACT as follows:

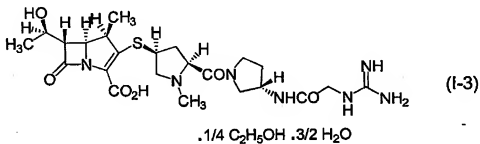

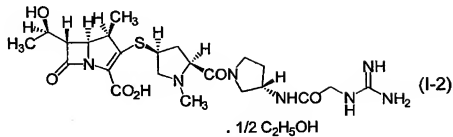

Abstract of the Disclosure

This invention provides crystalline forms of a 1-methylcarbapenem derivative of formula (I) or of pharmaceutically acceptable salts thereof. (I-1, (I-2) or (I-3)

Appl. No. 10/625,317

Reply to Office Action of June 22, 2005

The crystalline forms of the 1-methylcarbapenem derivative exhibit excellent antibiotic activity against various bacterial strains and sufficient stability for practical use.
